

## Policy: POL-SMS006 ENVIRONMENTAL POLICY

Seifert Systems (Malta) Ltd operates at sites numbers HF09 and HF10 in Hal Far Industrial Estate, Birzebbuga BBG3000, Malta and is committed to run its operations in line with the requirements of ISO14001 Environmental Management System standard.

This will be done by further commitment to:

- a) Continually improve the company's environmental performance and prevent pollution by identifying the environmental aspects of our activities and eliminating, reducing or controlling the significant environmental impacts identified. This will be sought mainly by:
  - Seeking to minimise the consumption of water;
  - Installation of photovoltaic panels in order to reduce consumption of energy from the grid;
  - Reduction in generation of hazardous waste;
  - Where practical, monitor, control, and reduce air emissions and water discharges;
  - Reduction of scrap material generated.
- b) Comply with the laws and regulations of the Republic of Malta, the European Union and International Treaties of which Malta is a signatory.
- c) Evaluate the environmental performance by setting environmental objectives and targets and reviewing through periodic management reviews.
- d) Ensure that all Seifert Systems employees are fully aware of this policy and encouraging their participation in the effort to **REDUCE, REUSE, and RECYCLE** waste wherever possible.
- e) Document, implement and maintain the ISO14001 Environmental Management System in line with and as an integral part of our ISO9001 Quality Management System.
- f) Protect the environment by minimising adverse environmental impacts from new developments by integrating environmental management practices and procedures in the design phase and throughout the product life cycle.
